

SSC MOCK TEST – 193 (SOLUTION)

1. (C) As, Pneumonia is caused by Virus.
Similarly, Amoebiasis is caused by Protozoa.

2. (B) As, H E A D S V Z W
Reverse ↑
Reverse ↑
Reverse ↑
Reverse ↑

Similarly, M I L K N R O P
Reverse ↑
Reverse ↑
Reverse ↑
Reverse ↑

3. (B) As, $18^2 - (1+8) = 315$
Similarly, $16^2 - (1+6) = 249$

4. (C) Except **Break**, others are feelings.

5. (B) Except **ACEG**, others have one Vowel.

6. (C) $8432 \Rightarrow 8 \times 4 = 32$
 $6848 \Rightarrow 6 \times 8 = 48$
 $7321 \Rightarrow 7 \times 3 = 21$
7858 $\Rightarrow 7 \times 8 \neq 58$

7. (A) **1432**

8. (B) Let age of C = x years
age of B = 2x years
and, age of A = (2x + 3) years
Now, $(2x + 3) + 2x + x = 33$
 $\Rightarrow 5x = 30$
 $\Rightarrow x = 6$
So, age of B = $2x = 12$ years

9. (C) **INTENTION**

11. (C) 7, 8, 12, 21, 37
 $+1^2$ $+2^2$ $+3^2$ $+4^2$

12. (A) The given series are sequence of prime numbers.

13. (D) $63 + 9 - 32 \div 3 \times 9$
After interchanging the signs as per given details,
 $63 \div 9 \times 32 - 3 + 9$
 $= 7 \times 32 - 3 + 9$
 $= 224 - 3 + 9$
= 230

14. (B) As, H A T E
 $\downarrow \downarrow \downarrow \downarrow$
 $8 + 1 + 20 + 5 = 34$

Similarly, L O V E
 $\downarrow \downarrow \downarrow \downarrow$
 $12 + 15 + 22 + 5 = 54$

15. (C) $3 \times 5 \times 7 = 105$
 $5 \times 7 \times 9 = 315$
 $7 \times 9 \times 11 = 693$

16. (B) $(13 + 5) \times 2.5 = 45$
 $(8 + 4) \times 2.5 = 30$
 $(21 + 7) \times 2.5 = 70$

17. (C) As, $50 * 16 \Rightarrow \frac{50 + 16}{2} = 33$

$38 * 24 \Rightarrow \frac{38 + 14}{2} = 26,$

and, $67 * 33 \Rightarrow \frac{37 + 33}{2} = 50$

Similarly, $43 * 15 \Rightarrow \frac{43 + 15}{2} = 29$

I. \times II. \times
Hence, **Neither conclusion I nor conclusion II follows.**

\therefore He is now **12km west** with respect to his starting position.

20. (C) Required number of squares = **8**

22. (B)
23. (D)
24. (A)
25. (B)

27. (D) Phosphorylation is the chemical addition of a Phosphoryl group (PO_3^-) to an organic molecule.
Cellular respiration is a set of metabolic reactions and process that take place in the cells of organisms to convert biochemical energy from nutrients into adenosine triphosphate (ATP) and then release waste product.
Pyruvate oxidation is the conversion of pyruvate into acetyl-CoA by the enzyme pyruvate dehydrogenase. It connects glycolyses and the krebs cycle.
28. (C) 7 States/Union Territories have more than 75% forest cover are- Mizoram, Lakshadweep, Andaman and Nicobar Islands, Arunachal Pradesh, Nagaland, Meghalaya and Mizoram
8 States/Union territories have forest cover between 33% to 75% are- Tripura, Goa, Sikkim, Kerala, Uttarakhand, Dadar and Nagar Haveli, Chhattisgarh and Assam.
29. (D) Some more 2018 Arjuna Awardees- Himadas (Athletics), Smriti Mandhana (Cricket), Subhankar Sharma (Golf), Manpreet Singh and Savita (Hockey), Rahi Sarnobat, Ankur Mittal and Shreyasi (Shooting), Manika Batra and G. Sathiyani (Table Tennis) and Rohan Bopanna (Tennis).
30. (D) Ananda bazar Patrika was a Bengali language Patrika started by Tushar Kanti Ghose and his father Siris Kumar Ghose. Dainik Jagran was started by Shri Purnan Chandra Gupta in 1942. Malayala Manorama published from Kerala by Malayala Manorama company limited, Headed by Mammen Mathew. It is the second oldest newspaper in Kerala after Deepika.
31. (B) People of Indian-origin aged 45-65 can avail of the benefits under this scheme.
32. (A) Marginal cost is the cost added by producing one additional unit of a product. Fixed costs are business expenses that are not dependent on the level of goods or services produced by business. It include rent, buildings, and machinery etc. Variable costs increase at a constant rate relative to labour and capital. It include wages, utilities and materials used in production etc.
33. (A) The fourth place is Nashik.
36. (B) Lord Curzon served as Governor General and Viceroy of India from 6 January 1899 to 18 November 1905. Police commission, education commission, enactment of Indian University Act, 1904, Land Resolution of 1902, Panjab Land Alienation Act 1900, Partition of Bengal in 1905 were important events during his tenure. Lord Ripon (1880-84) replaced Vernacular Press Act, appointment of Hunter commission, reduced in Salt duty and formed local self Government. During Lord Dalhousie (1848-1856) period second Anglo- Sikh war (1849) was fought. He annexed many states by doctrine of lapse. First railway line between Bombay and Thane was opened in 1853 and in the same year Calcutta and Agra were connected by Telegraph. He passed the widow remarriage Act, 1856.
38. (B) Force which acts on an object without coming physically in contact with it, called Non-Contact Force Applied Force, Gravitation Force, Normal Force, Air Resistance Force, Tension Force and String Force. Electrostatic Forces are attractive or repulsive forces between particles that are caused by their electric charge.
40. (C) Reserve bank of India Act, 1934 is the legislative act under which the Reserve Bank of India was formed. This act along with the companies Act, which was amended in 1936, were meant to provide a frame work for the supervision of banking firms in India. The Securities and Exchange Board of India Act, 1992 enacted for regulation market in India. It was amended in years 1955, 1999 and 2002
41. (D) Finance commission formed on 22 November 1951. Present chairman is N. K. Singh.
43. (A) 20 February – World Day of Social Justice
18 April – World Heritage Day
30 April – Ayushman Bharat Diwas
45. (C) Nagaland – Ntangki National Park, Fakim and PulieBadze Wildlife Sanctuary and Rangapahar Reserve Forest.
Jharkhand – Dalma, Gautama, Hazaribagh, Palkot, Parasnath and Udhana lake Wildlife Sanctuary.
Mizoram – Murlen and Phawngpui National Parks.
Tripura – Rajbari and Clouded Leopard National Parks and Rows, Sepahijala and Trishna Wildlife Sanctuary.

47. (C) Part III – Fundamental Rights (Articles 126 – 35)
Part IV – Directive Principles of State Policy (Articles 36-51)
Part V – The Union Government (Article 52 – 151)
50. (A) In computing, an emulator is hardware or software that enables one computer system to behave like another computer system (called the guest).

51. (B) Slant height (L) = $\sqrt{4^2 + 3^2}$
= $\sqrt{16+9} = \sqrt{25} = 5\text{cm}$
Area of Slant surface = 4 × Area of Triangle
= $4 \times \frac{1}{2} \times 6 \times 5 = 60\text{cm}^2$
Total surface area = Area of base + Area of
Slant Surface = $(6)^2 + 60$
= $36 + 60$
= **96cm²**

52. (C) Let the number be $(10x + y)$
By reversing, it becomes $(10y + x)$
ATQ,
 $(10y + x) - (10x + y) = 27$
⇒ $9(y - x) = 27 \Rightarrow y - x = 3$
So, the possible pairs of (x, y) are
(1, 4), (2, 5), (3, 6), (4, 7), (5, 8), (6, 9)
Thus, there are **6** possible numbers
i.e. 14, 25, 36, 47, 58, 69.

53. (B) 1.02, 6.8 and 0.51
= $\frac{102}{100}, \frac{680}{100}, \frac{51}{100}$
HCF = $\frac{\text{HCF of Numerator}}{\text{LCM of Denominator}}$
= $\frac{\text{HCF}(102, 680, 51)}{\text{LCM}(100, 100, 100)} = \frac{17}{100} = \mathbf{0.17}$

54. (A) Cost Price of 1 ball = $\frac{300}{12} = ₹25$
S.P of 1 ball = 30
So, Profit = ₹ (30 – 25) = ₹ 5
∴ Required profit percentage
= $\frac{5}{25} \times 100 = \mathbf{20}$

55. (D) Let X pupils in the class.
Total increase in marks
= $x \times \frac{1}{4} = \frac{x}{4}$

∴ $\frac{x}{4} = 116 - 88 \Rightarrow x = \mathbf{112}$

56. (C) Let ages of Rama and Shyam be $13x$ and
 $9x$ years. Then, $\frac{13x+4}{9x+4} = \frac{15}{11}$
⇒ $11(13x+4) = 15(9x+4)$
⇒ $143x+44 = 135x+60$
⇒ $8x = 16$

⇒ $x = 2$
∴ Present age of Shyam = $9x = 9 \times 2$
= **18 years**

57. (B) Let profit when SP ₹80 = ₹x
Then, profit when SP ₹116 = ₹3x
ATQ,
 $3x - x = 116 - 80$
⇒ $2x = 36$
⇒ $x = 18$
So, CP = $80 - 16 = ₹ \mathbf{64}$

58. (A) Area of circle = 2464
⇒ $\pi r^2 = 2464$
⇒ $r^2 = \frac{2464 \times 7}{22} \Rightarrow r = 28 \text{ mm}$

Circumference = $2\pi r = 2 \times \frac{22}{7} \times 28$
= 176 mm

Circumference of circle = Perimeter of equilateral Δ.

⇒ $176 = 3 \times \text{side}$

⇒ Side = $\frac{176}{3} \text{ mm}$

∴ Height = $\frac{\sqrt{3}}{2} \times \text{side} = \frac{\sqrt{3}}{2} \times \frac{176}{3}$
= $\frac{\mathbf{88}}{\sqrt{3}} \text{ mm}$

59. (B)

Let AB = $2a = 12\text{cm}$
⇒ $a = 6\text{cm}$
and, $r = 10\text{cm}$

We have,

$PB = PA = \frac{ar}{\sqrt{r^2 - a^2}}$
= $\frac{6 \times 10}{\sqrt{10^2 - 6^2}} = \frac{60}{8} = \mathbf{7.5\text{cm}}$

60. (D) $\angle ABC = 80^\circ$
 $\angle AEB = 70^\circ$
∴ $\angle BAE = 180^\circ - (80^\circ + 70^\circ) = 180^\circ - 150^\circ = 30^\circ$
 $\angle BCD + \angle DAB = 180^\circ$ (opp. angles of cyclic quadrilateral ABCD)
⇒ $\angle BCD + 30^\circ = 180^\circ$
⇒ $\angle BCD = 180^\circ - 30^\circ = 150^\circ$
∴ $\angle DCE = 180^\circ - \angle BCD = 180^\circ - 150^\circ = \mathbf{30^\circ}$

61. (B) Put, $a = 4, b = 2.5$
 $a^3 + b^3 = (4)^3 + (2.5)^3 = 64 + 15.625$
= **79.625**

62. (A) $x^2 - \sqrt{2}x = -1$

⇒ $x(x - \sqrt{2}) = -1$

⇒ $x - \sqrt{2} = -\frac{1}{x}$

$$\Rightarrow x + \frac{1}{x} = \sqrt{2}$$

$$\therefore \frac{x^4 + 1}{x^2} = x^2 + \frac{1}{x^2}$$

$$= \left(x + \frac{1}{x}\right)^2 - 2x \times \frac{1}{x} = (\sqrt{2})^2 - 2$$

$$= 2 - 2 = 0$$

63. (B) Let the width of rectangle = x cm
Then, length of rectangle = $(x + 4)$ cm
 \therefore Area of rectangle = $l \times b$
 $\therefore 221 = x(x + 4)$
 $\Rightarrow x^2 + 4x = 221$
 $\Rightarrow x^2 + 4x - 221 = 0$
 $\Rightarrow x^2 + 17x - 13x - 221 = 0$
 $\Rightarrow x(x + 17) - 13(x + 17) = 0$
 $\Rightarrow x = -17, 13$
Width = $x = 13$ cm
Length = $x + 4 = 13 + 4 = 17$ cm
 \therefore Perimeter = $2(l + b) = 2(13 + 17)$
 $= 2(30) = 60$ cm

64. (B) $37.5\% = \frac{3}{8}$

Sum	Amount
8	11
8	11
8	11
<hr/>	
512	1331

C.I. = 819

ATQ,

1331 units = ₹ 2662

1 unit = ₹ 2

\therefore Sum = $512 \times 2 = ₹ 1024$

65. (B) A.T.Q,

$$\text{Required Time} = \frac{120 + 180}{(50 - 41) \times \frac{5}{18}}$$

$$= \frac{300}{9 \times \frac{5}{18}} = \frac{300 \times 2}{5} = 120 \text{ sec.}$$

= **2 minutes.**

66. (D) $\sin^2 6^\circ + \sin^2 12^\circ + \dots + \sin^2 84^\circ + \sin^2 90^\circ$
 $= \sin^2 6^\circ + \sin^2 12^\circ + \dots + \sin^2 84^\circ + 1$
 [$\therefore \sin 90^\circ = 1$]

No. of terms (n) = $\left(\frac{84 - 6}{6}\right) + 1 = 14$

Value of 14 terms = $\frac{14}{2} = 7$

[$\therefore \sin^2 6^\circ + \sin^2 84^\circ = 1$]

\therefore Total value = $7 + 1 = 8$

67. (B)

Let AB be the observer and CD be the tower.

$$BE = AC = 20\sqrt{3} \text{ m}$$

In $\triangle BDE$,

$$\frac{DE}{BE} = \tan 60^\circ = \sqrt{3}$$

$$\Rightarrow DE = BE \times \sqrt{3} = 20\sqrt{3} \times \sqrt{3} = 60 \text{ m}$$

$$\therefore CD = CE + DE = (5 + 60) = 65 \text{ m}$$

68. (A) Work done by A in 30 days = 75%

$$\therefore \text{Work done by A in 1 day} = \frac{75}{30}$$

$$= 2.5\%$$

Work done by A and B in 2 days
 $= (100 - 75)\% = 25\%$

\therefore In these 2 days, work done by A = $2.5 \times 2 = 5\%$
 So, remaining work ($25 - 5 = 20\%$) will be done by B in 2 days

\therefore B does 20% work in 2 days.

\therefore It will complete 100% work in **10 days.**

69. (B)

Given, $AB \parallel DE$

$AC \perp BD$

$BE \perp DE$

From line Properties,

$$60^\circ + \angle BDC = 180^\circ$$

$$\Rightarrow \angle BDC = 180^\circ - 60^\circ = 120^\circ$$

Now, $\angle BDE = 180^\circ - (40^\circ + 120^\circ) = 20^\circ$

$\angle BDE = \angle ABD = 20^\circ$ [Alternate angles]

\therefore In quadrilateral, sum of all angles = 360°

So, $\angle A + 20^\circ + 60^\circ + 120^\circ = 360^\circ$

$$\Rightarrow \angle A = 360^\circ - 200^\circ = 160^\circ$$

70. (C) $(\sec A + \tan A)(1 - \sin A)$

$$= \left(\frac{1}{\cos A} + \frac{\sin A}{\cos A}\right)(1 - \sin A)$$

$$= \left(\frac{1 + \sin A}{\cos A}\right)(1 - \sin A)$$

$$= \frac{1 - \sin^2 A}{\cos A} = \frac{\cos^2 A}{\cos A} = \mathbf{\cos A}$$

71. (B)

$\triangle ABC$ is a right angled triangle at C.

$\angle CAB = 45^\circ$

$\therefore \angle ABC = 45^\circ$

So, AC = BC = 7cm

$$\therefore AB = 7 \times \sqrt{2} \\ = 7\sqrt{2} \text{ cm}$$

AB (diameter) = $7\sqrt{2}$ cm

$$\therefore \text{Radius (AO)} = \frac{7}{\sqrt{2}} \text{ cm}$$

$$\text{Area of circle} = \pi r^2 = \frac{22}{7} \times \frac{7}{\sqrt{2}} \times \frac{7}{\sqrt{2}} \\ = \mathbf{77\text{cm}^2}$$

72. (C) ATQ,

We have,

$$\frac{\text{Area of } \Delta PQR}{\text{Area of } \Delta LMN} = \frac{(RP)^2}{(NL)^2}$$

$$\Rightarrow \frac{81}{324} = \frac{RP^2}{(28)^2}$$

$$\therefore RP = \frac{\sqrt{81}}{\sqrt{324}} \times 28 = \mathbf{14 \text{ cm}}$$

73. (B) Population of E = $\frac{30^\circ}{360^\circ} = \frac{1}{12}$ part

$$\text{Population of F} = \frac{11.11}{100} = \frac{1}{9} \text{ part}$$

Population of A and F together

$$= \frac{1}{12} + \frac{1}{9} = \frac{7}{36} \text{ Part}$$

\therefore Total population of A and F

$$= \frac{7}{36} \times 1152 = \mathbf{224}$$

74. (B) $\therefore 25\% = \frac{1}{4} \times 360^\circ = 90^\circ$

Population of (A + B)

$$= (60^\circ + 75^\circ) = 135^\circ$$

Population of (C + D)

$$= 65^\circ + 90^\circ = 155^\circ$$

\therefore Required Ratio of Population

$$= 135^\circ : 155^\circ$$

$$= 27 : 31$$

75. (D) $\therefore \frac{11.11}{100} = \frac{1}{9}$ part

Required number of children

$$= \frac{1}{9} \times 1152 = \mathbf{128}$$

MEANINGS IN ALPHABETICAL ORDER

Word	Meaning in English	Meaning in Hindi
Degeneration	intellectual or moral decline tending toward dissolution of character or integrity	अधःपतन
Forlorn	pitifully sad and abandoned or lonely.	निराश और अकेला
Inflation	a general increase in prices and fall in the purchasing value of money	महंगाई
Joyful	experiencing or showing joy	आनंदित
Procrastination	the action of delaying or postponing something	विलंब
Recurring	occurring again	बार-बार होने वाला
Obligate	to bind legally or morally	बाधा करना
Serendipity	accidental discovery	अकस्मात से कुछ खोज करना
Ominous	suggesting that something bad is going to happen in the future	अपशकुन
Convenient	fitting in well with a person's needs,	सुविधाजनक
Benevolence	an act of kindness activities and plans	उदारता, कृपा
Benign	showing kindness and gentleness	दयालु
Cosmopolitan	belonging to all the world	सर्वत्रवासी
Insular	detached, standing alone, isolated	अकेला
Nefarious	flagrantly wicked or impious	अति पापी
Ornithologist	a person who studies or is an expert on birds.	पक्षीविज्ञानी
Parochial	Having a limited or narrow outlook or scope.	संकीर्ण
Rigorous	very strict and demanding	कठोर, कठिन
Wicked	morally very bad	दुष्ट

| 25. (B) | 50. (A) | 75. (D) | 100. (D) |

76. (C) 'Advice' being an uncountable noun will take 'much' before it. So replace 'many good advices' with 'much good advice' or 'many good pieces of advice'.
77. (C) Replace 'has' with 'has been' or 'is'. The sentence is in Passive Voice.
78. (C) Here we are using, 'aesthetic' as an 'adjective' to describe 'appeal' (noun). Thus replace 'aesthetics' with 'aesthetic'.
80. (A) Everything is singular hence singular verb is used. Thus 'has been' is correct.
81. (A) 'Cut down' means 'to reduce'.
88. (B) After 'no' singular countable noun or uncountable noun is used.
89. (B) 'Africa' is not in Europe so we cannot use preposition 'in' for it. Replace 'in' with 'to'.

Note:- If your opinion differs regarding any answer, please message the mock test and question number to 8860330003

Note:- Whatsapp with Mock Test No. and Question No. at 7053606571 for any of the doubts. Join the group and you may also share your suggestions and experience of Sunday Mock Test.

Note:- If you face any problem regarding result or marks scored, please contact 9313111777
